

How to adjust your embedded video display size in iLearn

1. Go to your course area and click turn editing on

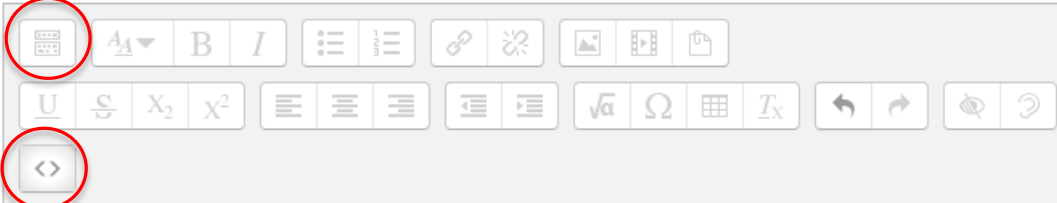

2. Find and click the 'Edit' option for your video

Then click 'Edit settings' so that the editing window displays

Label text*

```
<iframe width="560" height="315" src="https://www.youtube.com/embed/2X-NExWoWmo"
frameborder="0" allowfullscreen=""></iframe>
```

3. Click the 'Show more buttons' icon 

and then >

Click the 'HTML' icon 

4. Adjust the width and height settings – try either of these options 

Important – be careful not to delete any of the other code and to retain the inverted commas around each number value “ “

Width	Height
320	240
240	180

5. Scroll to the bottom of the page and click
